

Cancer Care & Recovery Services

These gentle, customized services support individuals undergoing or recovering from cancer treatment. Each session is tailored to the client's needs, treatment stage, and comfort level.

Cancer Care Massage & Lymphatic Support

Designed for individuals undergoing or recovering from cancer treatment, this gentle, customized service combines oncology massage, manual lymphatic drainage, and post-surgical comfort techniques. It may help reduce swelling, ease discomfort, improve circulation, and support the body's natural healing process.

Oncology Acupuncture for Recovery & Wellness

This safe, supportive approach may help manage treatment-related side effects while promoting overall well-being. It may help reduce nausea, neuropathy, fatigue, pain, stress, and other symptoms associated with cancer care, supporting comfort and quality of life throughout the healing journey.

Fatigue, Pain & Symptom Relief Sessions

These personalized sessions blend therapeutic techniques when treatment-related fatigue, chronic pain, or lingering discomfort affects daily life. The goal is to restore energy, reduce tension, improve physical comfort, and support recovery while helping clients feel stronger and more balanced.

Emotional Wellness & Nervous System Reset

Cancer treatment and recovery can be emotionally and physically overwhelming. This calming service is designed to help regulate the nervous system, reduce stress and anxiety, encourage relaxation, and create space for emotional healing. Gentle therapeutic techniques support greater balance, peace, and resilience throughout the wellness journey.
